

JIBRAN KHOT

Software Developer | Frontend Engineer | UI Specialist

Thane, India | +91 98347 87780 | jibrankhot5@gmail.com | [linkedin.com/in/jibrankhot](https://www.linkedin.com/in/jibrankhot)

CAREER SUMMARY:

Angular Developer with 2+ years of frontend development experience, specializing in building scalable, reusable UI components and dynamic form-based systems. Proven track record of improving code quality, reducing duplication, and integrating REST APIs in Angular environments (up to v17). Started in client-facing support, transitioned to VB.NET, and now lead interface development in real-world business systems. Strong in RxJS, PrimeNG, and agile delivery.

SKILLS:

- Frontend: Angular 17, TypeScript, HTML5, CSS3, JavaScript, PrimeNG
- Backend: VB.NET, SQL Server, REST APIs
- Tools: Git, Postman, Visual Studio, Azure DevOps
- Dev Practices: Reusable Components, Lazy Loading, Reactive Forms, Debugging, Agile

WORK EXPERIENCE:

Software Developer – Techmark Pvt. Ltd. (Jan 2023 – Present)

- Developed and maintained 20+ production-grade Angular forms for internal enterprise systems.
- Built reusable components, services, and form validators to enforce DRY principles and reduce bugs.
- Integrated RESTful APIs using RxJS operators like mergeMap and switchMap for real-time data flow.
- Applied lazy loading and module-based architecture to optimize performance and code organization.
- Debugged UI issues using browser dev tools, logging, and QA feedback loops, improving release quality.

Junior Software Developer / Support Engineer – Techmark Pvt. Ltd. (Jul 2021 – Dec 2022)

- Delivered fixes for production issues reported by clients via call/email with same-day resolution.
- Developed VB.NET forms and entry/report modules for legacy internal systems.
- Performed quick debugging and enhancements to meet fast turnaround times.
- Collaborated with QA and backend teams to improve system reliability during tight delivery cycles

RELEVANT PROJECTS:

School Management System – Angular, PrimeNG, Reactive Forms, Lazy Loading, REST APIs

- Created 10+ dynamic forms for student enrollment and staff records.
- Integrated conditional dropdowns, real-time validations, and API data synchronization.
- Enhanced form accuracy, reducing manual errors by 60% and speeding up admission workflows.

Banking Web Application – Angular, PrimeNG, Reactive Forms, Lazy Loading, REST APIs

- Developed a banking operations portal enabling staff to manage account and customer services.
- Implemented over 20 reusable Angular components.
- Built secure form workflows using RxJS and managed API integration with error tracking.
- Achieved 30% faster account onboarding and reduced manual corrections by approximately 25%.

Ecommerce Web Application – Angular, PrimeNG, Reactive Forms, Lazy Loading, REST APIs

- Served as a junior frontend developer on an ecommerce dashboard with modules for inventory, order tracking, product listing, and user management.
- Built reusable components and implemented reactive forms.
- Set up lazy-loaded modules to enhance performance, improving load time by 40% and reducing manual admin effort by approximately 25%.

Education:

- MSc in Information Technology – Mumbai University (2022) | 7.8 CGPA (First Class)
- BSc in Information Technology – Mumbai University (2020) | 7.2 CGPA (First Class)
